## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-46 are allowed.

Accordingly, applicant's claims are allowed for these reason and these reasons recited by applicant in amendment filed on 6/5/2007.

Applicant's independent claims 1 and 24: The present in invention is directed to a method for communicating between at least a first wireless central station and a plurality of wireless remote stations in a wireless instrumentation system, the independent claim identifies the patentably distinct feature "determining from said central station whether one or more of said remote stations, has become a lost station due to a communication failure between said central station; in response to determining that a remote station has become a lost station, identifying from said central station at least one of said remote stations that can act as a relay station that can relay information from said central station to said lost station or to another of said remote stations that can also act as a relay station; and transmitting information between said central station and said lost station via said one or more relay stations".

Applicant's independent claims 1 and 24 comprise a particular combination of elements, which is neither taught nor-suggested by prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance."
